

Hexafluoroisopropanol

About the product:

CAS number: 920-66-1

Molecular formula: C₃ H₂F₆O

Molecular weight: 168.04

1,1,1,3,3,3-hexafluoropropan-2-ol

Applications:

Hexafluoroisopropanol (HFIP) is used as an intermediate for pharmaceuticals, agrochemicals, and as a solvent or cleaner in electronics.

It is especially effective for solubilizing a wide range of polymers, including those that are not soluble in the most common organic solvents. It is also used to produce high quality anaesthetic products like Sevoflurane.

Specifications:

Properties	HFIP technical	HFIP high purity
Description	Clear colourless liquid	Clear colourless liquid
Purity (by GC) %	99 min	99.9 min
Water (%)	0.1 max	0.1 max
No single impurity over, ppm	1000	200
