Information Security Policy

We at Navin Fluorine International Limited (NFIL) understand the information security needs and expectations of both internal and external interested parties.
As an integral parts of management function, we are committed to maintain Confidentiality, Integrity & Availability (C-I-A) of information under Information Security Management System in accordance with the requirements of ISO/IEC 27001:2022.

We are further committed to:

1. Comply to all applicable laws, regulations and contractual obligations.
2. Implement objectives that take into account information security requirements following the results of applicable risk assessments and communicate these objectives and performance to all interested parties.
3. Adopt an Information Security Management System (ISMS) comprising manual, specific policy and procedures which provide direction and guidance on information security matters relating to employees, customers, suppliers and other relevant interested parties.
4. Work closely with customers, business partners and suppliers in seeking to establish appropriate security standards.
5. Adopt a forward-thinking on future business decisions, including periodic review of risk assessment and risk treatment process which may impact information security.
6. Ensure management provided resources effectively comply to meet information security requirements.
7. Constantly strive to meet customer's expectation in terms of information security.
8. Implement continual improvement of Information Security Management System (ISMS).
